

Autumn/Winter Sales Offer (valid until 31st, January 2010)

Remote Access Gateway IGW/922

VPN-protected Remote Access

Remote Access Gateway IGW/922

For the VPN-protected remote access to distributed automation systems via Internet SSV offers with the new IGW/922 a low-cost and immediately usable Remote Access Gateway for the DIN-rail.

The IGW/922 is simply connected by one of the two 10/100 Mbps Ethernet LAN interfaces over a DSL router with the Internet. With help of the internal PPPoE protocol it is also possible to link the IGW/922 directly to a DSL modem without a router. An optional GPRS- or UMTS wireless modem can be integrated to allow a wireless internet connection.

The OpenVPN inside the Linux of the IGW/922 is already configured for using a virtual OpenVPN server via SSV/ECC Cloud Computing Service. The system administration is easily made with a web-based user interface.

The IGW/922 is supplied with the necessary voltage by an external 24 VDC power supply.

- Atmel AT91RM9200 ARM9-MCU @180 MHz
- 64 MB SDRAM
- 32 MB NOR Flash with preinstalled Linux
- 2x 10/100 Mbps Ethernet LAN
- 1x RS232 via Sub-D interface
- 1x RS232/RS485 via terminal block
- 1x Alarm output
- 1x internal ESL extension slot
- Integrated OpenVPN with SSV/ECC VPN support
- Web-based system configuration
- DIN-rail mounting
